EDUCATION

University of Nevada, Reno

Bachelor of Science in Mechanical Engineering   **May 2017**

EXPERIENCE

Software QA Tester (TrainerRoad)   **May 2017 – Present**

- o Establish test cases and manually tested mobile/desktop features with software engineers
- o Wrote scripts in Google Sheets (JavaScript) to automate documentation processing
- o Assist software developers with design process to enhance user interaction

RELEVENT PROJECTS

- **Airbnb Clone**
  - o Goal: Design and develop a full-stack Airbnb clone that allows users to schedule lodging for guests
  - o Features implemented:
    - Securing back-end authentication with JSON Web Tokens
    - Using Amazon Simple Storage Service (AWS) Bucket to store pictures
    - Integrating Google Maps to display addresses in listing
- **Noteskeeper**
  - o Goal: Create a full-stack Trello clone that allows users to create boards and keep track of notes.
  - o Features implemented:
    - Constructing new objects such as boards, lists, and cards
    - CRUD operations to a database
    - Handling multiple nested input types and querying values through a REST API
- **Weather App**
  - o Goal: Create a client side React web app that allows users to get the current week's weather
  - o Features implemented:
    - Making requests to OpenWeatherMap/Google Geolocation API to update user dashboard
    - Creating a search bar that handles form validation

TECHNICAL SKILLS

- **HTML, CSS, JavaScript, Node JS, SQL, Python**
- **React, Redux, Express, Bootstrap, Semantic UI**
- **MongoDB**
- **Git**
